

Mohammed Shamhan

Network Administrator | SD-WAN | Aruba | Cisco | Fortinet | Wireless Infrastructure

+91-805-677-0212 | mohammedshamhan1@gmail.com | Portfolio: <https://myportfolio.mohammedshamhan1.workers.dev/>
Bengaluru - India

PROFESSIONAL SUMMARY

Results-driven Network Administrator with 4+ years of experience designing, deploying, and managing enterprise network infrastructure across multi-site environments. Proven expertise in SD-WAN deployment, wireless solutions, network security, and incident management. Experienced in handling P1, P2, and P3 severity incidents with timely resolution within SLA targets. Skilled in AP vulnerability management, firmware upgrades, and wireless controller lifecycle management following ITIL change management processes. Strong foundation in Aruba, Cisco, and Fortinet technologies.

PROFESSIONAL EXPERIENCE

Network Administrator | Tata Consultancy Services — Bengaluru, Karnataka, India

April 2023 – Present

- Managed and resolved **P1, P2, and P3 severity** network incidents within defined SLA timelines, ensuring minimal business disruption and continuous service availability
- Acted as **primary incident owner** for critical outages — coordinated with stakeholders, provided real-time impact assessment, and drove service restoration with end-to-end ownership
- Performed **Access Point (AP) firmware upgrades** in response to identified security vulnerabilities — assessed **CVEs**, identified affected AP models, tested recommended firmware in staging, and deployed to production following approved **change management procedures**
- Executed **wireless controller (WLAN controller) upgrades** including pre-upgrade health checks, configuration backups, maintenance window scheduling, phased rollout, and post-upgrade validation to ensure zero-impact deployments
- Deployed and managed **Aruba EdgeConnect SD-WAN** infrastructure across multiple enterprise sites including WAN IP configuration, tunnel establishment, and connectivity validation
- Troubleshooted and resolved SD-WAN issues including tunnel instability, WAN failover failures, and performance degradation using **DX NetOps Spectrum** monitoring platform
- Administered **Aruba Central** cloud platform for centralized configuration management of switching and wireless infrastructure; configured VLANs, access policies, and QoS settings
- Managed **Aruba ClearPass** for network access control, MAC authentication, **802.1X**, and endpoint onboarding; troubleshooted authentication failures and RADIUS server issues
- Created and maintained DNS records and DHCP configurations in **Infoblox** including IP reservations and scope management
- Implemented and modified **Fortinet** firewall rules as part of approved change requests; performed pre/post-implementation validation
- Participated in on-call rotation for after-hours network support; maintained network documentation including topology diagrams, SOPs, and troubleshooting runbooks

Cyber Security Analyst | EITACIES INC — Coimbatore, Tamil Nadu, India

October 2021 – October 2022

- Conducted behavioral analysis of SaaS applications to identify security vulnerabilities; captured and analyzed decrypted network traffic using **Wireshark** and **Fiddler** proxy
- Developed XML signatures for application-level security policies; implemented **URL filtering** and **Layer 7** protocol controls for granular threat detection
- Built custom security signatures based on network traffic patterns (**PCAP analysis**) for advanced threat detection and firewall policy enforcement

Senior Process Executive | Cognizant — Coimbatore, Tamil Nadu, India

February 2019 – June 2021

- Processed transactions meeting client SLA requirements with high accuracy; resolved customer issues ensuring first contact resolution
- Maintained business controls and compliance standards; communicated effectively with clients to address queries and escalations
- Trained and mentored new team members on process procedures, best practices, and quality standards

TECHNICAL SKILLS

SD-WAN: Aruba EdgeConnect, Silver Peak, Fortinet SD-WAN, Tunnel Management, WAN Optimization, Failover & HA

Wireless & AP Management: Aruba Central, WLAN Controller Upgrades, AP Firmware Lifecycle, Vulnerability Patching, 802.11 Wi-Fi Standards

Network Access Control: Aruba ClearPass, 802.1X, MAC Authentication, RADIUS, Cisco ISE, NAC, Endpoint Onboarding

Routing & Switching: BGP, OSPF, VRF, VLAN, QoS, STP, VPN, IPsec, GRE, TCP/IP

Security & Firewall: Fortinet Firewall, URL Filtering, L7 Protocol Analysis, Threat Detection, Wireshark, Fiddler, PCAP Analysis

Monitoring & Management: DX NetOps Spectrum, SolarWinds, Infoblox DNS/DHCP, ServiceNow, SNMP

Protocols: TCP/IP, HTTP/HTTPS, DNS, DHCP, FTP, SSL/TLS, IPsec, GRE, 802.11

Vendors & Platforms: Cisco (Routers, Switches, Wireless Controllers), Aruba (EdgeConnect, Central, ClearPass), Fortinet

ITSM & Processes: ITIL Change Management, Incident Management (P1/P2/P3), SLA Compliance, RCA, Vulnerability Management, Vendor Coordination

KEY PROJECTS & ACHIEVEMENTS

- **AP Vulnerability Remediation & Firmware Upgrade:** Identified APs running vulnerable firmware versions from security advisories (CVEs), validated recommended upgrade versions in lab environment, and executed mass AP firmware upgrades across enterprise sites following ITIL change management — achieving full vulnerability closure within compliance deadlines
- **Wireless Controller Upgrade:** Led end-to-end WLAN controller upgrade projects including pre-upgrade assessment, configuration backup, change request submission, scheduled maintenance windows, phased upgrade execution, and post-upgrade stability validation with rollback readiness
- **SD-WAN Migration:** Participated in SD-WAN site migrations — planning, configuration, testing, cutover, and post-migration validation across multiple enterprise sites
- **Incident Management:** Managed P1/P2/P3 critical network incidents requiring multi-team coordination; resolved all within SLA with detailed RCA and permanent fix documentation
- **Security Policy Implementation:** Deployed firewall rules, NAC policies, and URL filtering controls; coordinated with security teams for audit-compliant change implementations

EDUCATION

Bachelor of Science — Computer Technology / Computer Systems Technology

2015 – 2018

PSG College of Arts and Science — Coimbatore, Tamil Nadu, India
